Wave	1: Instance	2: Initial config	3: Technical tests	4: Iterations	5: Readiness
Wave 1 (CR, GH, PH)	Done	Ongoing	Ongoing		
Wave 2	Pending				
Wave 3	Pending				

# Progress

# Project Plan for the Generic Registry Project

# Initiation

Well-defined goals, desired outcomes and success criteria serve as compass for the whole project

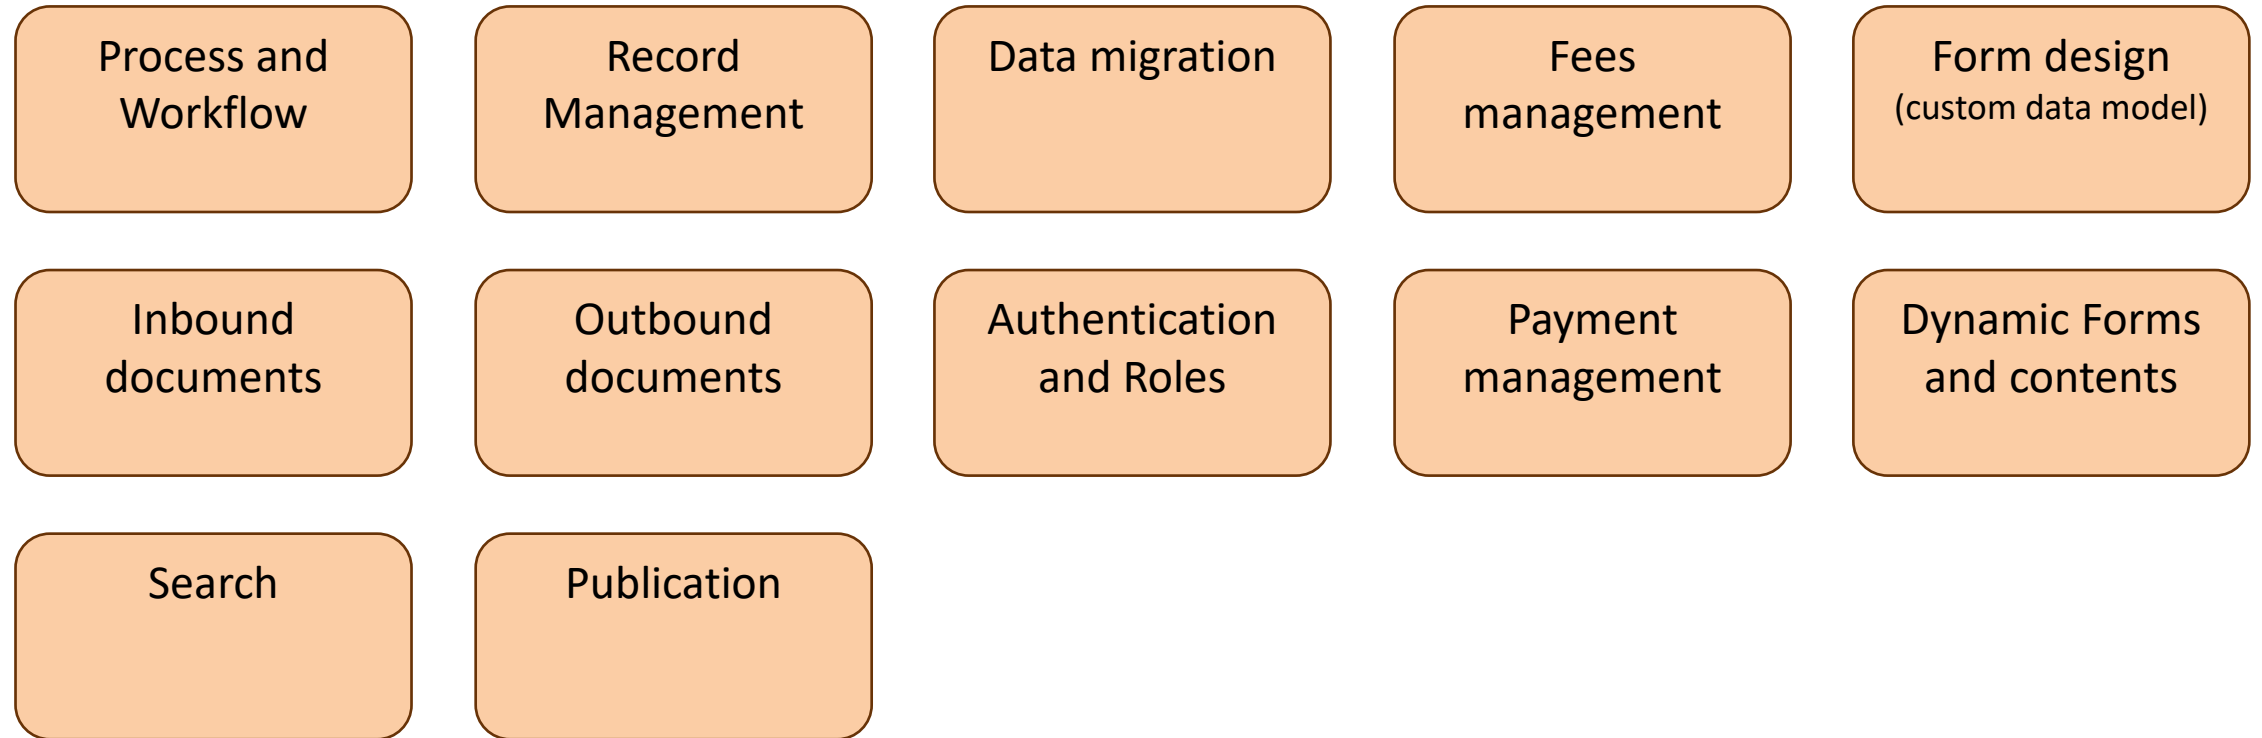

# Minimum Viable Product (MVP)

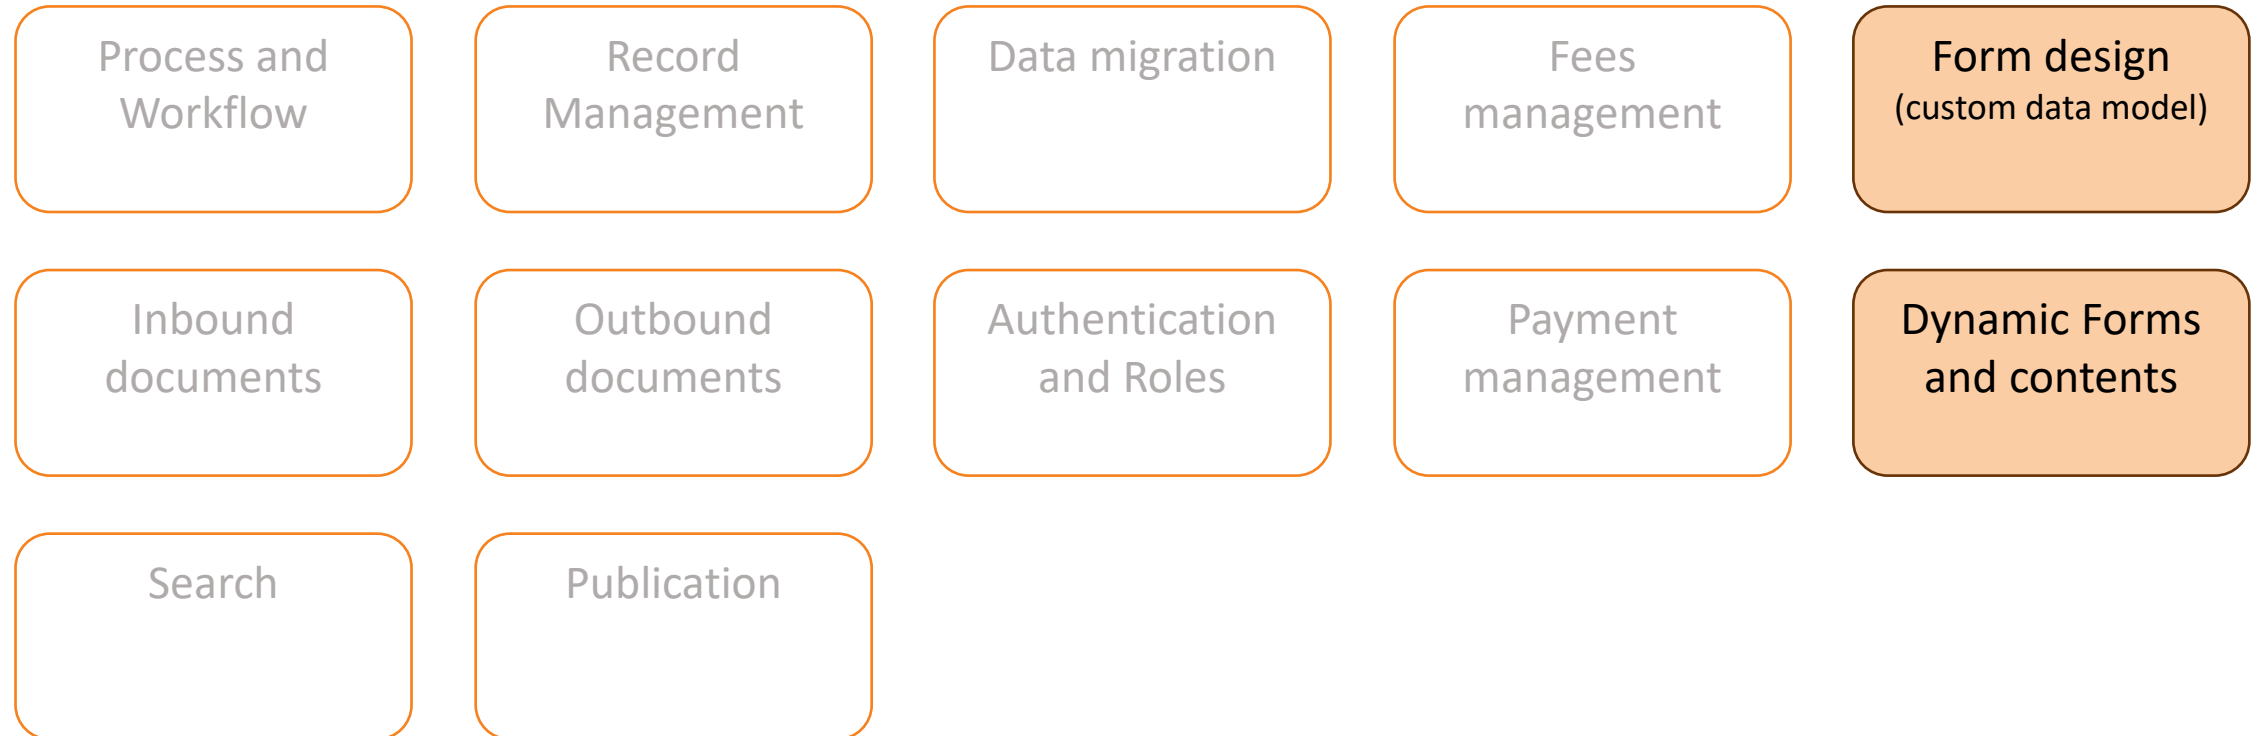

## Basic functionalities:

- 1) Online Filing, including supporting documents, text, to multimedia
- 2) Basic formality examination
- 3) Registration
- 4) Certificate of registration
- 5) Online search (basic metadata only: file number; name; date)
- 6) Post-filing events (i.e. change in ownership)

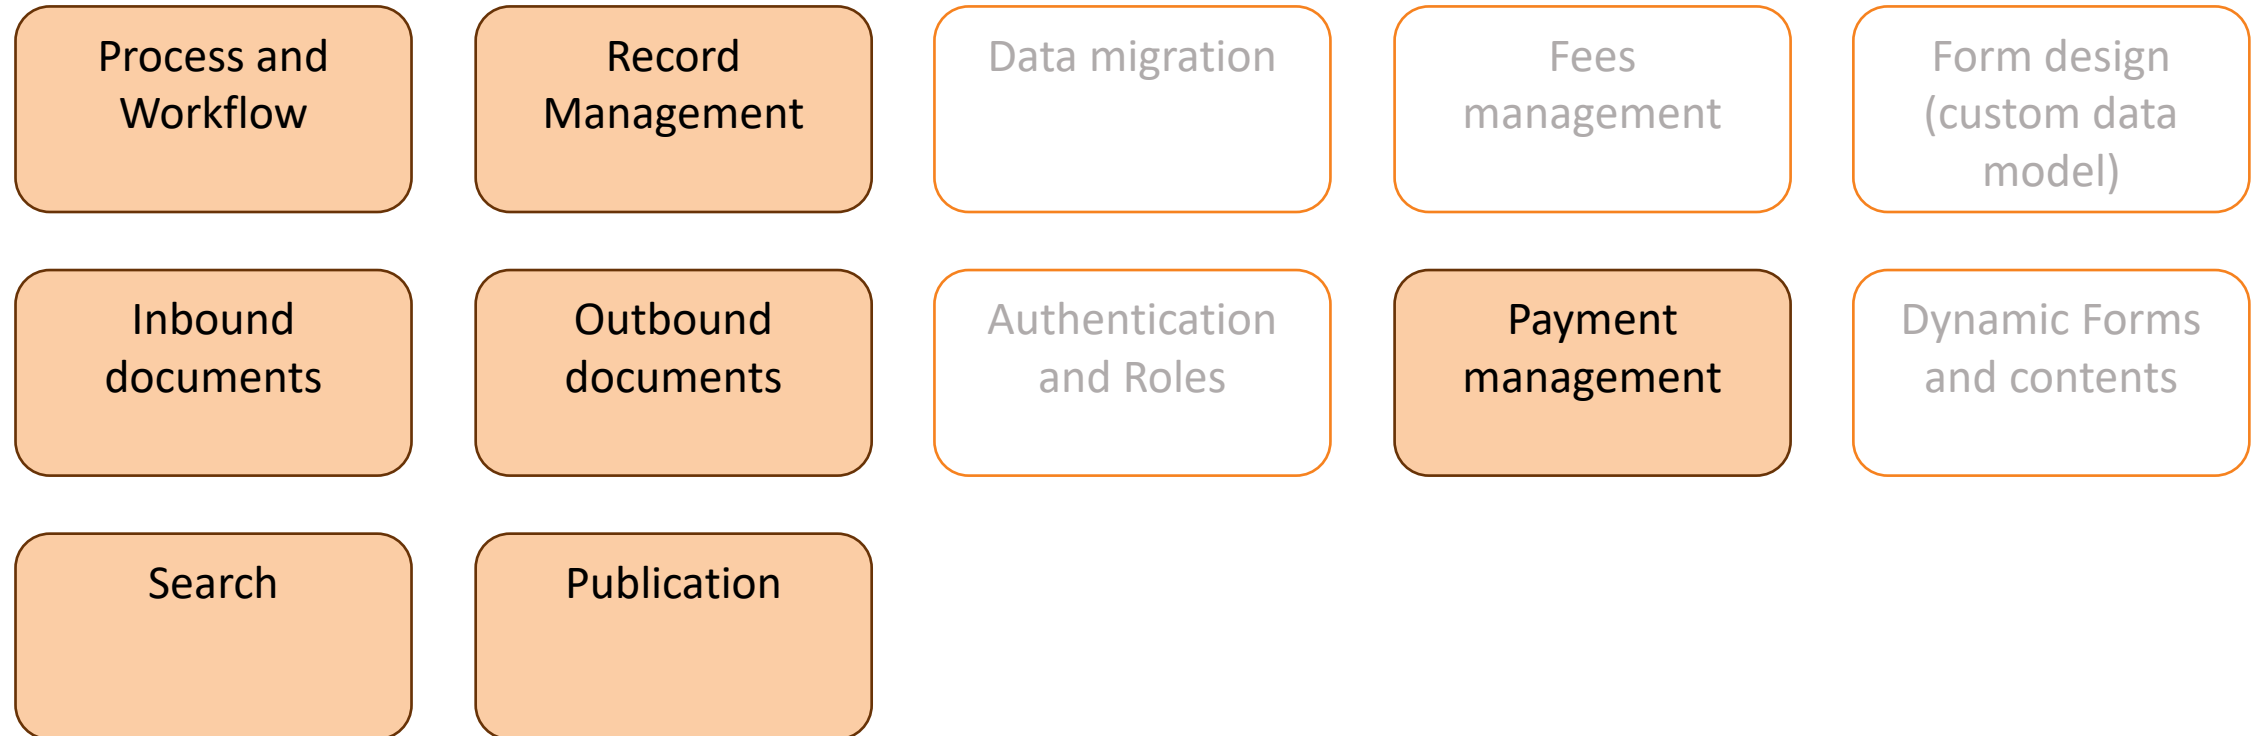

# Capabilities

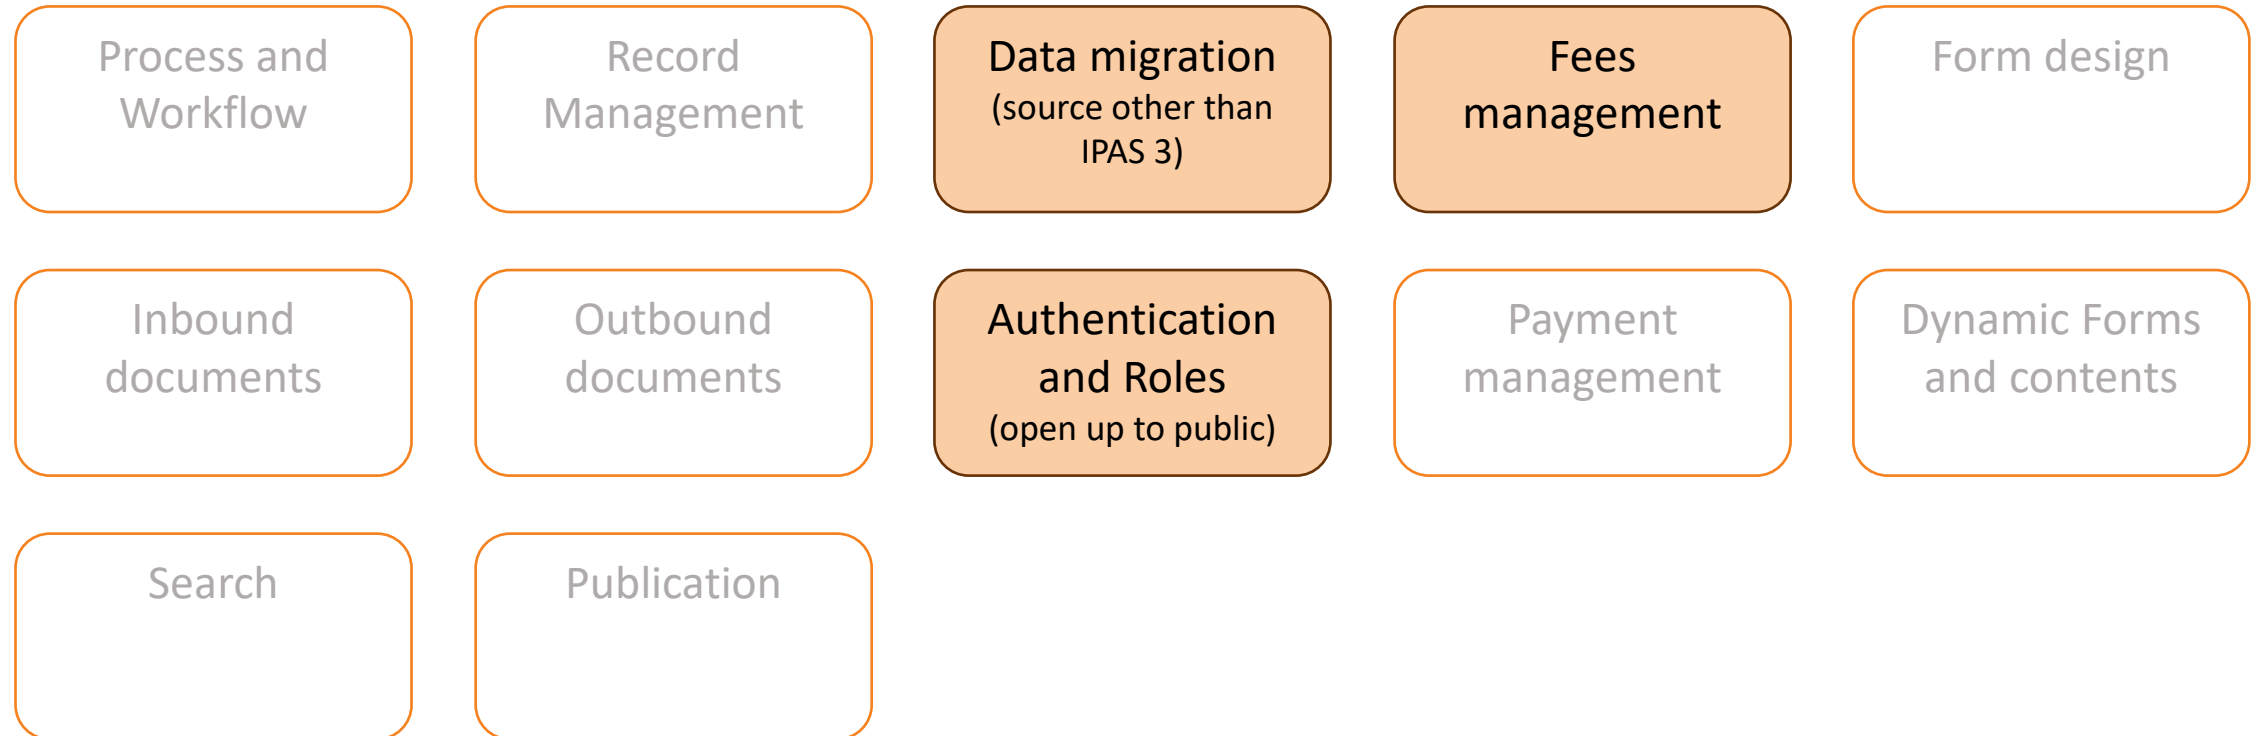

# Capabilities: New being developed

# Capabilities: Adapted and reused

# Capabilities: Extension

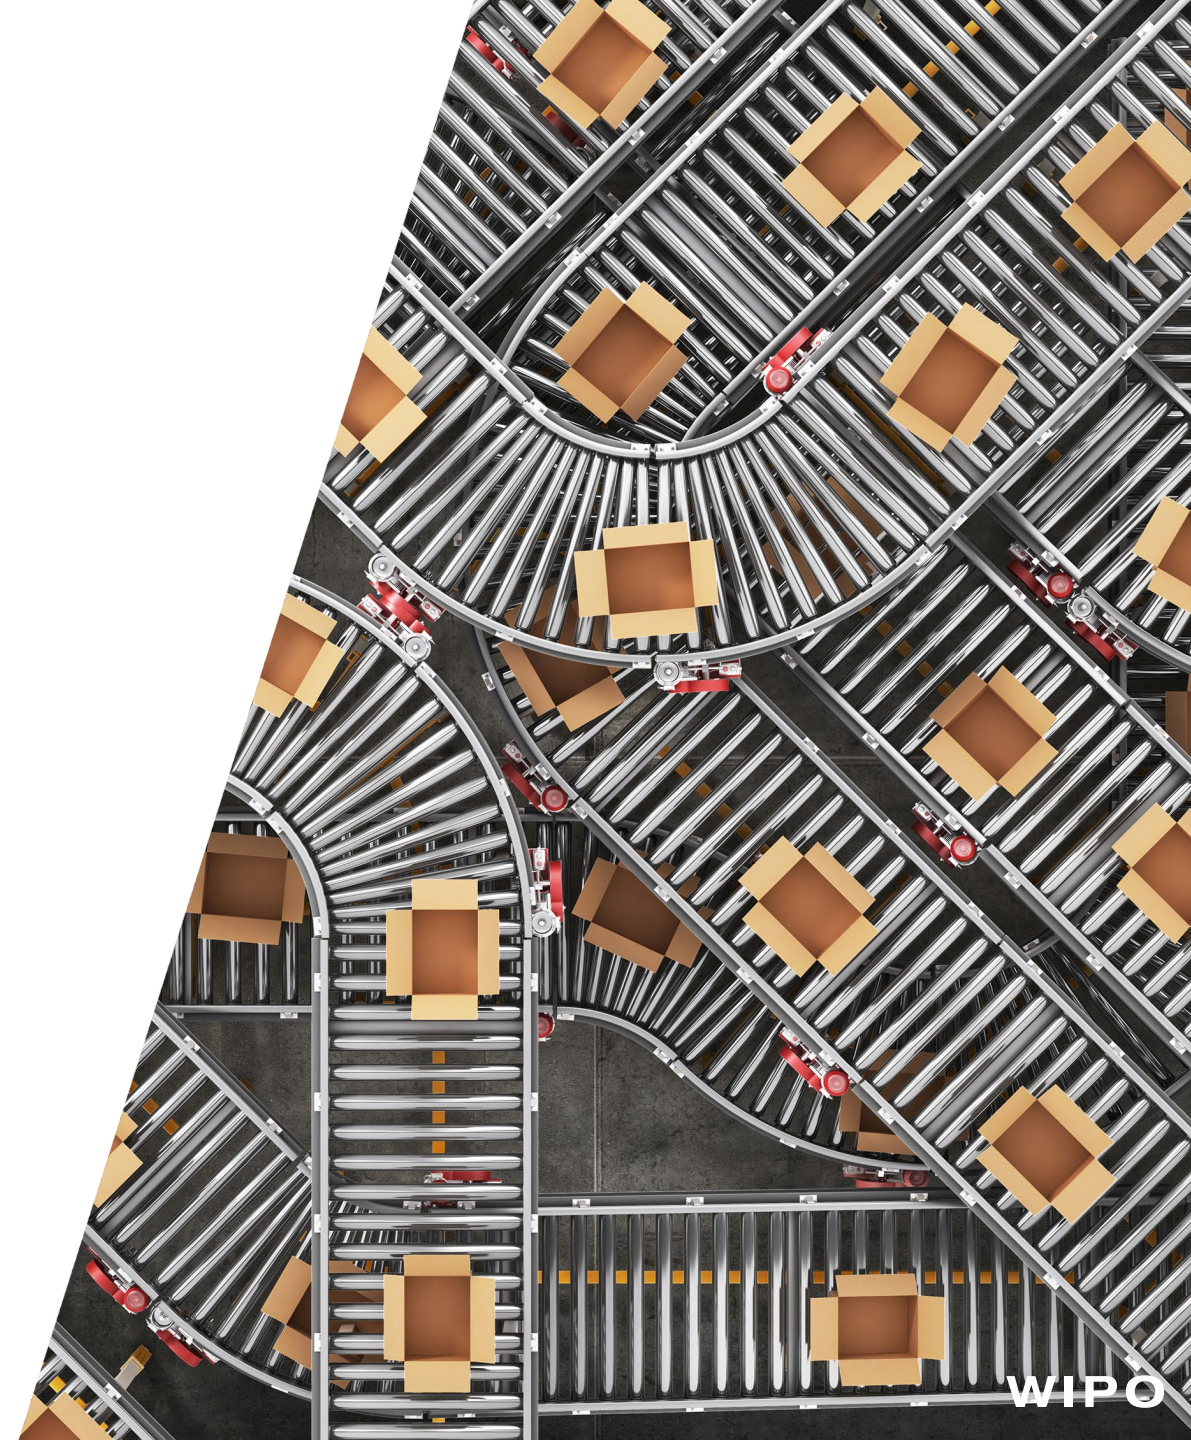

# Pilot

- Work with specific offices
- Real-life conditions, but controlled setting
- Adapt to feedback

# Handover

- Production launches
- Handover to production support
- Project closure

# Demo

Philippines Dedicated  
Pilot Environment

# Looking ahead

- User onboarding process (Self registration)
- Post-registrations transactions
- Fee based on custom form content
- Complete data migration utility
